

# Acid Dosing ROV Backpack Skid

## Subsea-refillable bladder

The acid dosing ROV backpack skid includes a 60 gallon bladder in a rear-mounted skid configuration. The acid dosing backpack can be attached to top-hat type ROVs. The skid's integrated high-quality, field-proven pump supplies acid to multiple acid shrouds simultaneously, depending on project requirements, and can also be used to draw acid from a remote bladder to fill the onboard reservoir.

### FEATURES

**Reversible pump to supply and draw acid**

**Capable of pumping to multiple acid shrouds simultaneously**

**17H single port hot stab**

## Subsea-refillable bladder

### Technical Data

Dimensions (H x W x L)	40 x 13 x 57 in / 102 x 34 x 146 cm
Weight in air	617 lb / 280 kg
Weight in water	145.5 lb / 66 kg
Dosing rate	1.76 gal/min / 8 L/min
Bladder capacity	60 gal / 227 L

Bladder refill/dosing interface	17H single port hot stab via ½ in hose
---------------------------------	--

Fluid compatibility	Typical marine scale acids including sulfamic acid, citric acid, and dilute hydrochloride
