

Oceaneering Mobile Robotics

Connecting the future of logistics with mobile robotics

Oceaneering Mobile Robotics (OMR) solves your material handling and logistical challenges by designing, manufacturing, implementing, and maintaining innovative mobile robotics solutions. Our highly skilled and experienced team ensures a flawless mobile robotics solution at the lowest total cost without sacrificing performance. We deliver safe and sustainable systems focused on reducing your carbon footprint, using standardized robots and a user-friendly software control platform. Our mobile robotics technology offers infrastructure-free navigation, enabling faster implementation while providing exceptional flexibility and a safe operational environment.

(intra-) logistics

OMR Products and Services

Our mobile robot systems consist of one or more robots from our forklift and underride families, advanced supervisory software, and supporting infrastructure. Integration management ensures that these turnkey logistic systems are optimized to suit customer needs and seamlessly interface with other processes.

MaxMover™ CB D 2000

CompactMover™ FOL U 1200

UniMover™ O 600

We can support your systems with **OMR Supervisory Software** that incorporates cloud, industrial internet of things (IIoT), machine learning, and big data technologies to present a streamlined view of operations to enable better decision-making. Additional support is available via our comprehensive **Lifecycle Services** that ensure the continuity and performance of our systems with quick, professional support anywhere in the world, 24/7.
